All existing registrations must have a “home district” designation by July 27, 2007

A home district is defined in Section 2452(n) of the PERP regulation. It states that a home district is the local air district designated by the Responsible Official as the one in which the engine or equipment unit resides in most of the time.

Use this form to designate a home district for specific registered engine(s)/equipment unit(s), or you may designate one home district for your entire company or agency. If you want to designate different home districts for different engines/equipment units, please use multiple forms. Only one home district designation per form.
